

MOVIT[®]

PERFORMANCE

Braking Systems

Total Performance

PERFORMANCE.

STRONG ACCELERATION REQUIRES APPROPRIATE DECELERATION.

NO COMPROMISE.

Hard work, years of testing and intensive research have taken us one step closer to our dedicated goal: the perfect braking system.

Caliper MOV'IT-6 BILLET

- Extremely stiff Aluminium alloy
 - > Supreme stability
 - > Highest braking force
- Progressive piston arrangement
 - > Even heat transfer
 - > Even pad wear
- Open pad setting
 - > Optimized Cooling

1

Braking pads MOV'IT®

- Enlarged friction surface
- Even heat transfer
- Lower system temperature
- Longer Lifetime

2

Friction ring MOV'IT®

- Highly efficient DDE™ cooling system
 - > Double directional evolvent
- Special alloy
 - > Superior thermal conductivity
 - > Highest fading resistance

3

PERFORMANCE.
NO FADING.
RELIABILITY.

Through its technically advanced construction, we believe, no other braking system achieves such an efficient dissipation of kinetic energy. Carefully designed brake discs with a sophisticated ventilation system that offers the best thermal conductivity and thermal capacity ensure that heat is being extracted as quick as possible.

MOV'IT® Rapad-X™

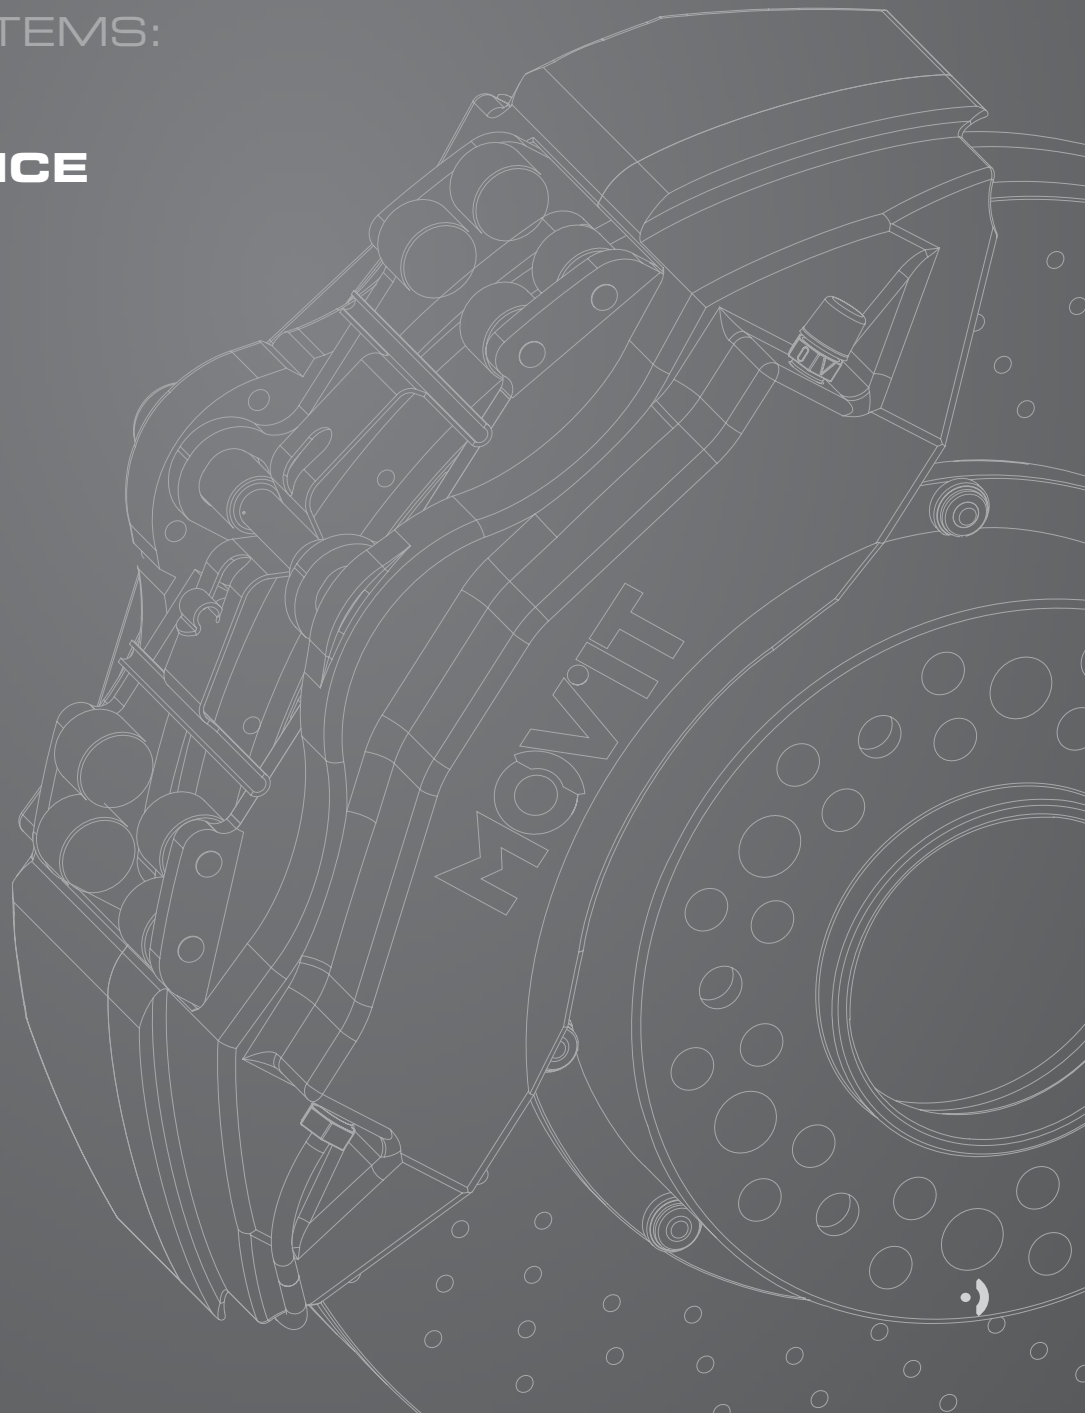

MOV'IT® DDE™

MOV'IT® achieves superior results through cutting-edge technology.
